#### Lake Havasu City Fiscal Year 2025-26 Proposed Budget

The enclosed schedules detail the Proposed Budget for Fiscal Year (FY) 2025-26 and provide estimates for the fiscal year ending June 30, 2025 (FY 2024-25). It provides comparisons and explanations of major variances between the two fiscal years for both expenditures and revenues.

#### **Expenditures**

The Lake Havasu City Proposed FY 2025-26 budget totals \$261 million (excludes depreciation). This includes \$69.6 million for the Capital Improvement Plan (CIP), \$19.5 million for capital outlay and \$2.7 million for contingency.

The most significant difference between the Estimated Actuals and the FY 2024–25 Budget is \$36 million in CIP funds that will not be spent by June 30, 2025. As a result, this \$36 million will be carried forward into FY 2025–26 to complete ongoing projects and is included in the FY 2025–26 CIP total of \$69.6 million.

<sup>\*</sup> Excludes Depreciation

The FY 2025–26 Budget represents an overall increase of 8% from the FY 2024–25 Budget (excluding depreciation). It includes a net of 11 new full-time positions, \$13.3 million for one-time purchases, and an additional \$7.9 million for CIP.

The proposed Salaries and Wages Budget is \$4.3 million higher than the FY 2024–25 Budget. As noted above, the proposed budget includes the net of eleven (11) new full-time positions. The wage and benefit calculations include applicable employee wage increases on review dates, an estimate for the Compensation and Classification Study, increases to part-time wages based on hours worked, and a workers' compensation increase of approximately 3%. The Arizona State Retirement System (ASRS) employer contribution rate is decreasing from 12.27% to 12.00% in FY 2025–26. The Public Safety Personnel Retirement System (PSPRS) employer contribution rates are changing from 70.3% to 71.9% for police, and from 71.8% to 68.7% for fire. These rates for public safety include all tiers within the plan.

The proposed Services Budget is \$5.9 million higher than the FY 2024–25 Budget, primarily due to expanded Citywide professional development and training, additional repair and maintenance programs, and increased maintenance agreement costs.

The proposed Capital Outlay Budget is \$1.2 million higher than the FY 2024–25 Budget. This increase is primarily due to carryforwards and supplemental one-time items funded by additional revenues received in FY 2024–25 and the available fund balance.

The proposed budget for Other Expenditures is approximately \$2.4 million lower than the FY 2024–25 Budget. This decrease is primarily due to a reduction in anticipated grant opportunities.

# Lake Havasu City Fiscal Year 2025-26 Proposed Budget

#### Revenues

The Lake Havasu City Proposed FY 2025–26 Revenue Budget totals \$191.5 million. FY 2025–26 expenditures (excluding depreciation) exceed revenues by \$69.3 million. This gap is primarily due to the City's Capital Improvement Plan (CIP) and other one-time purchases, which are funded by one-time available resources (also referred to as fund balance) and additional revenues resulting from stronger-than-projected economic growth. Available resources refer to accumulated revenues exceeding accumulated expenditures from prior years.

Project Descr	intion & Justification	

The Airport has a hangar wait list of over 145 parties. Based on market conditions and economic projections, a project for City-developed hangars would be economically feasible and executable through the Airport Fund. The project would include selling hangars, pre-paid leases and retaining hangars for short and long-term leases. The project would increase Cityownership of revenue-producing assets while satisfying hangar wait list requirements.

**Project Description & Justification** 

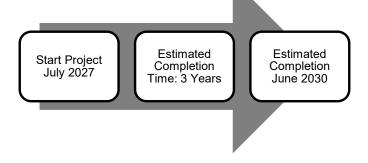

Design and construction of the aircraft parking apron associated with the Central Hangar Area (approximately 25,500 square yards). The Central Hangar Area Pavement has a Pavement Condition Index (PCI) estimated to be 39 in 2029 and is in need of reconstruction.

Operating Budget Impact/Other:

Federal Aviation Administration (FAA) and Arizona Department of Transportation (ADOT) grant funding will be leveraged (95.53%) to design and construct this improvement. No operating impact is anticipated.

#### **Project Description & Justification**

Design and construction of bank stabilization and concrete drop structures along Havasupai Wash between the Hillside Drain and the Avalon Drain. An Engineering and Analysis report was completed by Dibble Engineering in 2014 to assess the most critical locations within the City's wash system in need of repair. These improvements were identified in the top 10 projects.

To-date, the construction is overwhelmingly funded through outside dollars, which includes the removal of excess dirt, grading, concrete walkway, shade structures, lighting, drainage, electrical infrastructure to accommodate food trucks and vendors, and a grass area for event users. Future improvements may (or may not) include restrooms, concession building, shade structures or a pedestrian bridge, depending on available funding and Council direction.

#### **Project Description & Justification**

With Lake Havasu's high temperatures, especially during the summer months, residents need more family-friendly outdoor cooling spaces. A splash pad offers a safe, fun, and water-efficient recreational activity that families can enjoy. Additionally, the City lacks an inclusive water play facility tailored for young children, seniors, and individuals with disabilities. The splash pad's accessibility features ensure that all community members, regardless of age or ability, can participate.

The operational impacts of Fire Station 7 will align closely with those of existing fire stations. Projected operational expenses for utilities and supplies have been calculated using historical data, adjusted for annual inflation. Personnel costs are based on the assumption that Fire Station 7 will become operational in December 2026 or the first quarter of 2027. To effectively staff and operate Fire Station 7, six (6) additional Firefighter/Paramedic positions will be required, with a minimum daily staffing level of three (3) personnel.

**Operating Budget Impact/Other:** 

#### **Project Description & Justification**

The fire study recommended the construction of Fire Station 7 at 3846 Sloop Dr due to increased housing developments, inadequate Fire/EMS coverage, and longer response times to Havasu Foothills Estates and surrounding areas. Fire Station 7 will allow the fire department to improve response times in the service area, with response times expected to decrease from 6-14 minutes to 2-6 minutes.

Fire Station 7 is designed to serve approximately 12,000 residents and 8,000 parcels, providing protection for over \$2 billion in assets and covering more than 91 miles of roadway. The design of the station will achieve a balance between functionality, cost-effectiveness, and seamless integration into the surrounding community, thereby enhancing the overall quality of life for the residents it serves.

The Lake Havasu City Police Department requires the space necessary to properly train our law enforcement professionals. Classroom training and hands-on training provides our law enforcement professionals with the tools, training and resources needed to protect the public. Currently, the Police Department utilizes the training room at the Police Station for classroom-type instruction and the space at the facility on Pima Drive for hands-on tactical training. Having the space at the Police Station to provide classroom and hands-on training will provide a seamless process when moving from classroom to mat training. The proposed project would provide sufficient space to accommodate smaller classes and larger academy classes.

This project involves constructing a new bridge over the English channel at a location just west of the Kings View Condos with new roads being constructed on each side. The northerly approach will come off of the London Bridge Road at its location of the existing city owned parking lot just outside of Windsor State Park. The southernly approach will come off of the McCulloch Blvd. at its location of the existing city owned parking lot prior to its intersection with Beachcomber Blvd. The project will include the bridge structure, roads to the bridge with multiuse path and bike lanes.

#### **Project Description & Justification**

The IPS has had 3 major failures since it was constructed 12 years ago. Due to these failures a surge analysis was performed on the lift station in 2016 and three possible solutions were considered and evaluated. The recommendation and most cost-effective scenario is to install a 600-cubic foot air chamber (surge tank) within the lift station site including a hydraulic connection to the Lift Station discharge header.

Island Treatment Plant (ITP) effluent ponds that supply reuse customers on the Island. With growing concerns of water shortages these ponds will be a necessity to provide reuse water consistently. The installation of the second bridge allows a additional water supply to go onto the island and a second raw water line to go off of the island. Approximately 4,500' of 18" water main is needed for the potable water and 2,900' of 36" water line for the raw water. Installation of these mains will ensure adequate water supply in the future.

There are three main tree	tmont plant improvements identifie	

There are three main treatment plant improvements identified in the Water Master Plan that are in need of upgrades. The first is to construct enclosures over certain treatment components of the water treatment plant to limit the intrusion of dust and debris into the Biological Filters and Cascade Aerator. The second improvement is to install a flow meter on the 18-inch bypass pipe within the plant footprint. This will provide more accurate flow meter data, during times of isolation or repairs.

The third improvement is related to the chlorine disinfection system. The Water Master Plan also recommends that the City evaluate ways to minimize handling of the one-ton chlorine cylinders, replacement of existing shade structure with a new chlorine building and switch from gaseous chlorine to liquid sodium hypochlorite. These are related to safety as well.

The purpose of this project is to replace what used to be the sole source of water for SARA Park. The existing main is a 6" diameter AC main, under very high system pressures. The line was constructed through an existing culvert in order to cross SR95 several years ago as a temporary repair. The water main replacement was designed in 2019. This project will require ADOT permitting and coordination and a directional bore.

## FY 2025/2026 CLASSIFICATION AND COMPENSATION STUDY

**Findings and Recommendations** 

#### 1. EXECUTIVE SUMMARY

It is with pleasure that we present this summary describing the findings from the City's 2025-2026 classification and compensation study.

#### A. SUMMARY OF FINDINGS

- 1. The City has approximately 200 job descriptions in use for providing a variety of municipal services; internal data collection including the collection of employee job questionnaires for the review of job titles and job duties, used in the analysis. Minor title modifications are proposed in the displayed salary range placements (appendix).
- 2. 72% of the City's civilian classifications survey at market or just ahead of market averages; 28% of the City's classifications survey -5% or more below market (pages 2-6). The City's benefits offerings are in line with market practices and trends (page 5).
- 3. The City's Police and Fire salary ranges survey an average of -7% below market especially at range top out; greater market variances are visible for some command ranks (page 2).
- 4. A new "Open Range" salary table has been modeled for civilian job classifications, and jobs have been placed on to a salary range using the available market data, career ladder opportunity, and internal working relationships (page 7 and appendix).
- 5. Market revisions are proposed for the Step Plan for Police and Fire, to include Dispatch, Detention and Animal Control, which will re-align the City's Public Safety pay grades to market averages (page 8).
- 6. The estimated cost to implement the study's recommendations, to result in a salary plan modeled at market average, is \$1,225,000 plus benefits, before any planned FY 2026 salary administration actions (wage stabilization, steps etc.).

#### **B. SUMMARY OF RECOMMENDATIONS**

- 1. Adopt the proposed salary ranges and grade tables, modeled at market average (appendix).
- 2. Provide ongoing salary adjustments within the adopted salary range tables, as part of annual budgeting, to allow salaries to penetrate the proposed salary ranges. Periodically adjust the salary tables by a modest COLA or similar to allow for inflation (page 8).

#### 2. **EXTERNAL COMPARISONS**

The following paragraphs and tables describe the market data collected for the development of the updated salary plans.

#### A. SURVEY COMPARATORS

We obtained salary plan and job description details from the following employers for comparison:

Avondale	Maricopa
Casa Grande	Oro Valley
Flagstaff	Prescott
Marana	Queen Creek

Data from the private sector was also included wherever job matches exist utilizing Economic Research Institute's Salary Assessor for the immediate / surrounding statistical area.

#### B. SURVEY METHODOLOGY - MIDPOINT SALARY RANGE COMPARISONS

Market salary structures and the prevailing rates are often represented by their Midpoints, which are the amounts employers pay for sustained competent job performance.

The Midpoint is the most objective, occupation-specific and consistent component of salary structures among employers, as the varying widths of salary ranges are too great to utilize Minimum or Maximum.

For civilian classifications we compared the City's mathematical midpoints (Step 1 Plus Step 12. Divided by 2) to the same calculated midpoints found in the market. Additional analysis was performed at range entry and top for Police and Fire.

#### C. PREVAILING RATES COMPARISONS

#### D. MARKET BENEFITS COMPARISONS

Data from the comparison agencies was also collected for major elements of employee benefits, including pension, insurance for employees and dependents, paid time off and holidays.

The City's benefits offerings are in line with the practices and offerings of the survey comparators.

#### 3. PROPOSED PAY TABLES AND JOB PLACEMENTS

A listing of the suggested salary ranges for each classification can be found in the Appendix. The table below is the proposed pay table for civilian positions.

#### A. PROPOSED CIVILIAN SALARY RANGE TABLE

- Individual jobs can be re-assigned to different salary ranges when market moves
- Annually, budget for salary adjustments within the range (wage stabilization)

#### B. ASSIGNMENT OF JOB CLASSES TO SALARY RANGES

Job classes were placed as close to the market prevailing rates for comparable job classes as was practical, with consideration given for job complexity, minimum qualifications, and supervision exercised.

We utilized our professional judgment to prevent illogical relationships that could result from survey data directly linked into salary ranges, as there is no automatic logical job content relationship among survey data collected from various employers. Non-benchmark job classes were linked to benchmark job classes by professional judgment.

#### 4. SALARY ADMINISTRATION AND IMPLEMENTATION

Following are key salary plan use and maintenance procedures.

#### A. INITIAL IMPLEMENTATION AND ANNUAL UPDATES

We recommend the City's salary plan be established with approval of the proposed salary range placements, and subsequent plan updates made on the basis of the external prevailing rates.

#### Proposed Implementation - "At Market"

- Adopt the proposed pay tables and placements.
- Move employees to no less than the Minimum (civilian) or Next Nearest Step (public safety step plan) of their salary range / grade.

#### FY 2026 and Subsequent Years

- Provide regular adjustments to salaries within adopted ranges (market, step, staiblization)
- Periodically adjust pay tables (1.5%-3% increments) as market inflates, and/or
- Individual salary range placement adjustments per market survey (every 2-4 years)

#### B. REGULAR PLAN UPDATE STEPS

- 1. Secure re-affirmation of the City's market competitiveness policy or philosophy.
- 2. Obtain latest pay data from approved comparator employers (suggest every 2-4 years).
- 3. Compute the prevailing rate for each of the benchmark job classes.
- 4. Re-assign job classes to the salary ranges whose Midpoints most closely match prevailing rates.
- 5. Utilize professional judgment in job class re-assignment to prevent internal inequities and relationships not supported by relative job complexity.
- 6. Provide information to City Council for budgeting purposes.
- 7. Provide individual salary increases on the adopted date of the new plan.

# DISCUSSION & QUESTIONS

## Classification and Compensation Study

Study Findings and Recommendations

#### Scope and Summary of Services

All employees invited to complete job questionnaires; some positions participated in interviews with consulting staff (150).

Minor title modifications proposed where needed.

Conducted market salary and benefit survey.

Avondale	Maricopa
Casa Grande	Oro Valley
Flagstaff	Prescott
Marana	Queen Creek

Designed new salary tables – "Open Range" for civilian, step plans for Police, Fire, Dispatch, Detention, Animal Control.

#### Survey Findings

- Before adjusting for inflation and regional cost of living differences, the City's current pay grades are competitive for 72% of civilian jobs.
- Police Officer and Firefighter pay grade below market at entry compared to survey cities; Police Officer entry also below Bullhead City, Kingman.
- Benefits are in line pension, health, paid time off, holidays at market.
